

SECRETDDS&T-4093-82
24 November 1982

MEMORANDUM FOR: Chief, Executive and Planning Staff, FBIS

FROM:

Chief, Planning Division, PRS/DDS&T

STAT

SUBJECT: FY 1985 R&D Planning Cycle

REFERENCE: A. My memo dated 3 August 1982, Same Subject,
DDS&T-3450-82
B. Your memo dated 21 September 1982, Same
Subject

1. ORD has reviewed your requirements and has submitted the attached R&D solution in the amount of \$400K against FBIS 3 "Advanced Automated Storage and Retrieval Technology".

2. ORD expects to support FBIS 2, "Analog Speech Compression" through technology development funding. With respect to FBIS 1, "Antenna Research", ORD's antenna R&D is focused in the area of clandestine and covert structures for the VHF and microwave frequencies; therefore, they do not expect to be conducting research in electrically-small HF antennas since much work is being done commercially in this area.

3. The next scheduled date is 3 January 1983 for submission of statement and degree of interest in the proposed solution. The solution has a point of contact for ease in resolving problems and my staff is available to assist when needed.

Attachment:
As stated
